

2nd Pdf

Point No. 1:

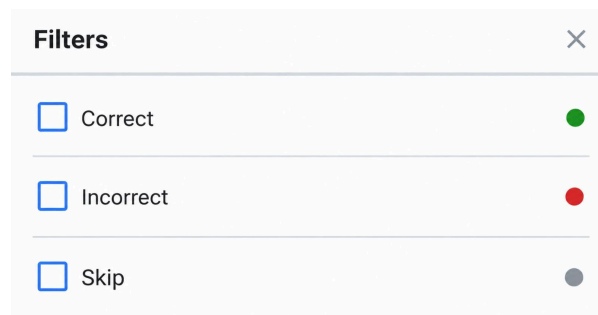

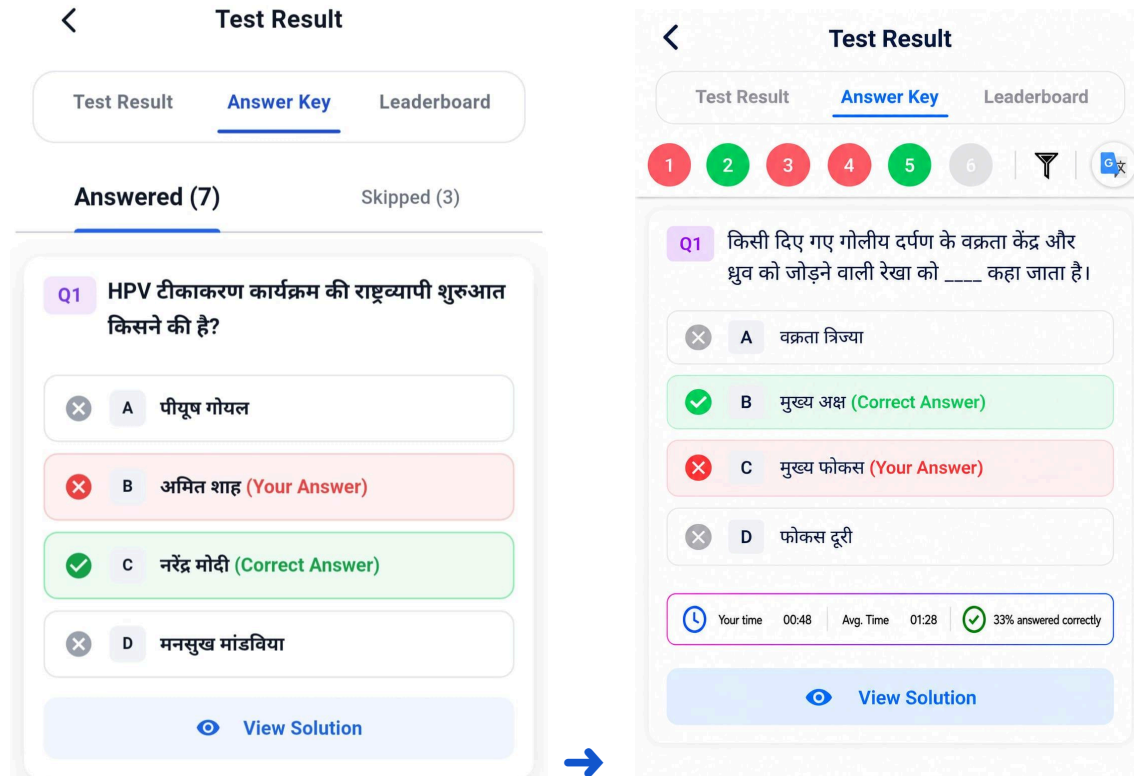

I want to add Percentile, Strengths, and Weaknesses features to Point No. 1, as shown in the image.

The Strengths & Weaknesses feature should provide a chapter-wise analysis, showing which chapters the user is Strong, Average, or Weak in.

This feature should be available for both subject-wise tests and mixed tests.

Point No. 2:

When the user clicks on the Answer Key, the screen should appear exactly as shown in the provided image.

Only one question should be displayed at a time. For example, when the user clicks on Q2, Q3, or Q4, only the selected question should be displayed on the screen.

Suppose the question is currently displayed in Hindi. When the user clicks on the Google Translate icon at the top, the question, answer options, and View Solution section should all be translated into English simultaneously.

Next to the Google Translate icon, there is a Filter icon. When the user clicks on the Filter icon, the following three options should be displayed:

- Correct
- Incorrect
- Skip

All three filter options should be fully functional and should perform their respective actions when selected.

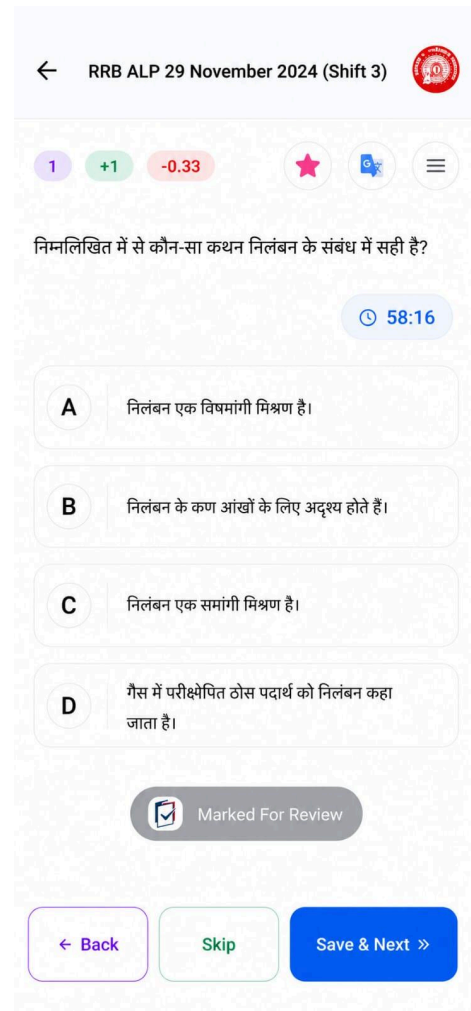

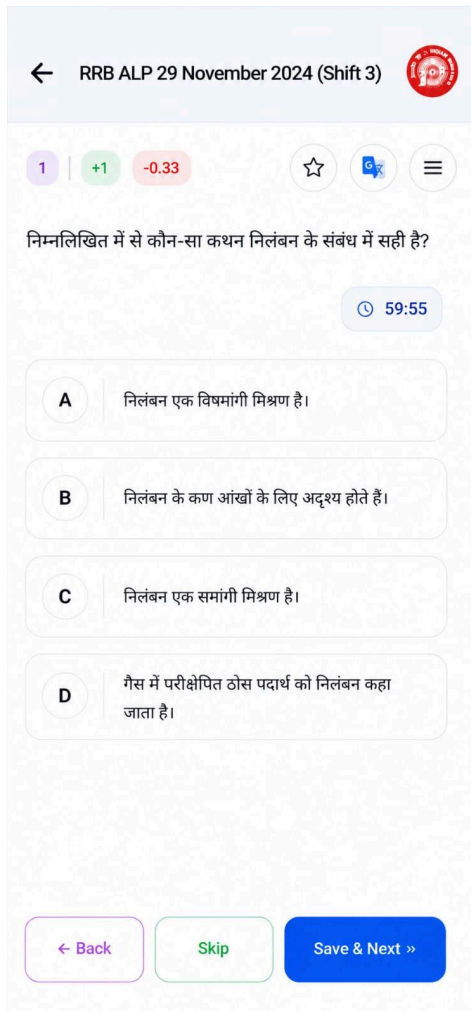

Additionally, the questions are currently displayed in bold text. Please change the question text to normal/regular font weight instead of bold.

I want to add a box above the “View Solution” button containing “Your Time,” “Avg. Time,” and “Answered Correctly,” exactly as shown in the image.

It should be the same design and layout as in the image.

Point No. 3:

I want to add a “Marked for Review” feature to this point, exactly the same way as shown in the images.

In the first image, I have added the “Marked for Review” icon next to the Google Translate icon. When “Marked for Review” is unticked, it should appear exactly like in the first image. When it is ticked, it should appear exactly like in the second image.

In the second image, “Marked for Review” with the logo is displayed between the Options and Footer Buttons. This should appear as a pop-up for only 2 seconds, and it should be shown only when the user clicks the “Marked for Review” button at the top.

I have also explained in the third image how all of this should appear in the Grid View. The third image is provided below.

In point no. 4, the options are not showing A, B, C, and D in front of them. Please fix this.

Point No. 5:

Increase the size of the circles above the RRB and SSC text just a little bit.

Point No. 6:

**RRB ALP 30 August 2018
(Shift 3)**

1. इस परीक्षा में कुल 75 प्रश्न होंगे।
2. प्रत्येक प्रश्न के 4 विकल्प होंगे, जिनमें से केवल एक ही सही होगा।
3. आपको इस परीक्षा को 60 मिनट में पूरा करना होगा।
4. कृपया गलत उत्तर का चयन करने से बचें, क्योंकि नकारात्मक अंकन (Negative Marking) लागू है।
5. हर सही उत्तर के लिए आपको 1 अंक मिलेगा और हर गलत उत्तर के लिए 1/3 अंक काटे जाएंगे।
6. जो प्रश्न आप हल नहीं करेंगे, उनके लिए कोई नकारात्मक अंकन (Negative Marking) नहीं होगा।

Agree & Continue

Reduce the size of only the Google Translate box slightly.

Point No. 7:

Whenever a test contains mixed questions from multiple subjects, the sectional summary should not be displayed. The sectional summary should be shown only for subject-wise tests.

Point No. 8:

For this point, we need to do App Store Optimization (ASO) for the app.

ASO Main Goals:

Rank higher in Play Store search results.

Increase the app's visibility in search.

Improve the conversion rate, so more users who view the listing install the app.

App Title – Include important keywords naturally. The main keyword, “Mock Test,” is already included in the current app title.

Point No. 9:

Change the email ID – Update the existing email ID to the new one.

Change the app screenshots – I will provide the new screenshots to be used in the app.
