

Point No. 1:

I only want the UI to be changed in Point No. 1, exactly as shown in the second image I provided. No other changes should be made. The login method should remain the same as it is now — login via Gmail.

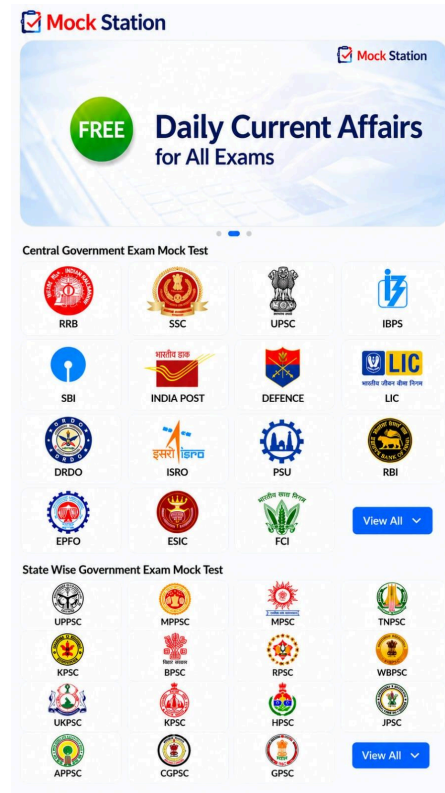

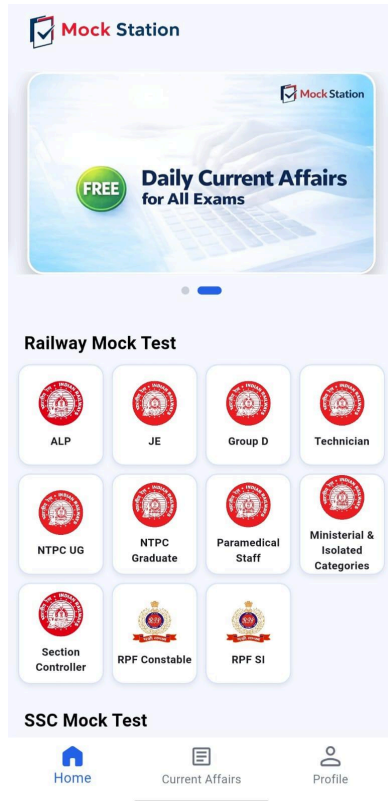

Point No. 2:

In Point No. 2, I want to add one more menu item to the footer menu named “News”, exactly as shown in the second image.

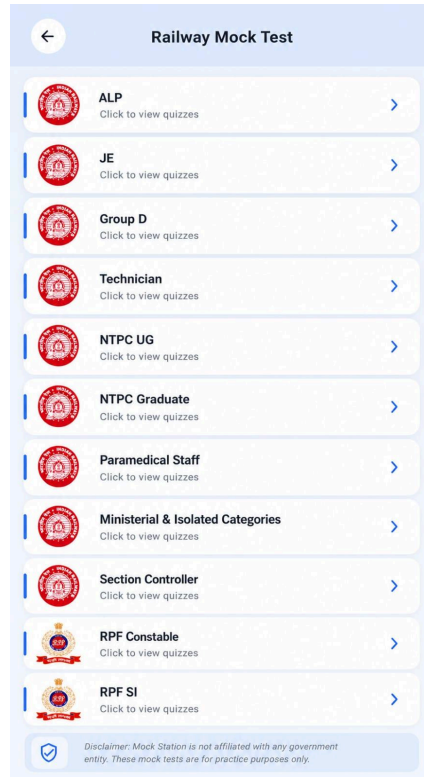

In this section, we should be able to create short posts of around 50–100 words about things like results, admit cards, answer keys, etc. At the end of each post, there should also be an option to add a website link. Please design and implement it accordingly.

Point No. 3:

In Point No. 3, I want the UI to be changed exactly like the second image I provided. The image carousel/scrolling images at the top should also be made smaller, matching the size shown in the second image. Other than these UI changes, nothing else should be changed.

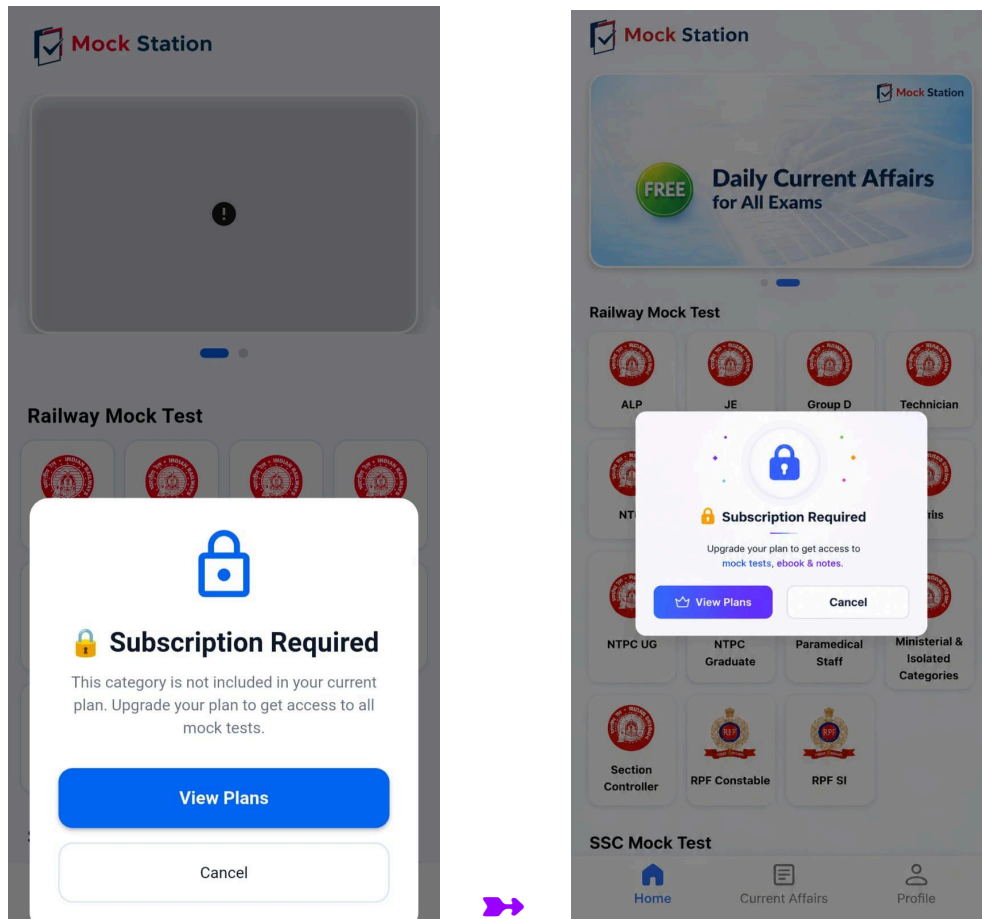

Point No. 4:

For Point No. 4, I want it to be designed exactly like the image provided in this point. In the second image of Point No. 3, when the user clicks on “RRB”, the screen/page shown in the Point No. 4 image should open exactly like that.

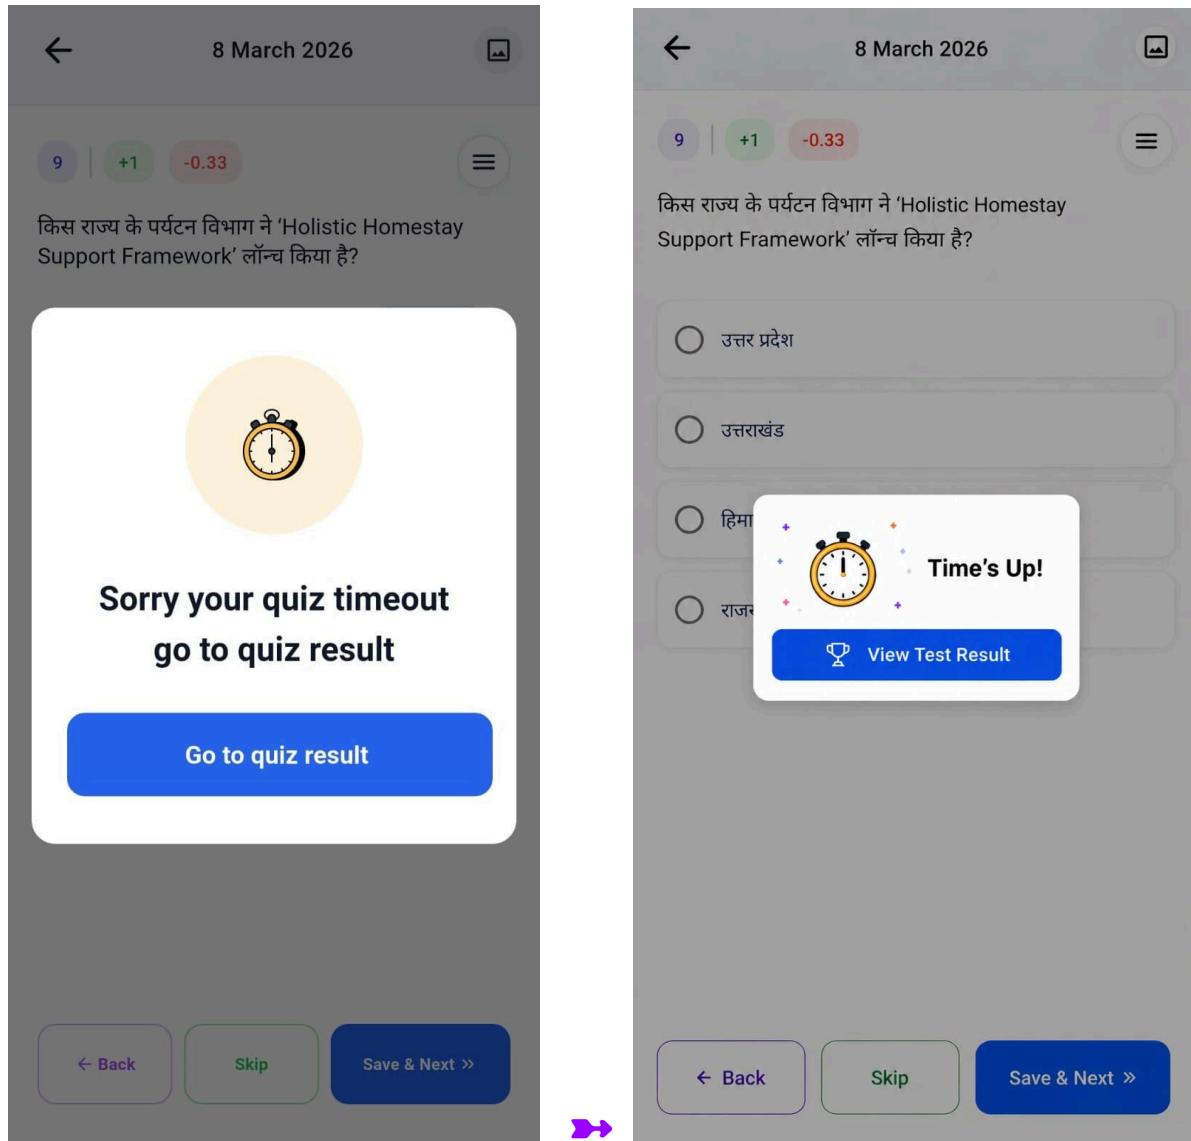

Everything should work and look the same as shown in the Point No. 4 image.

Point No. 5:

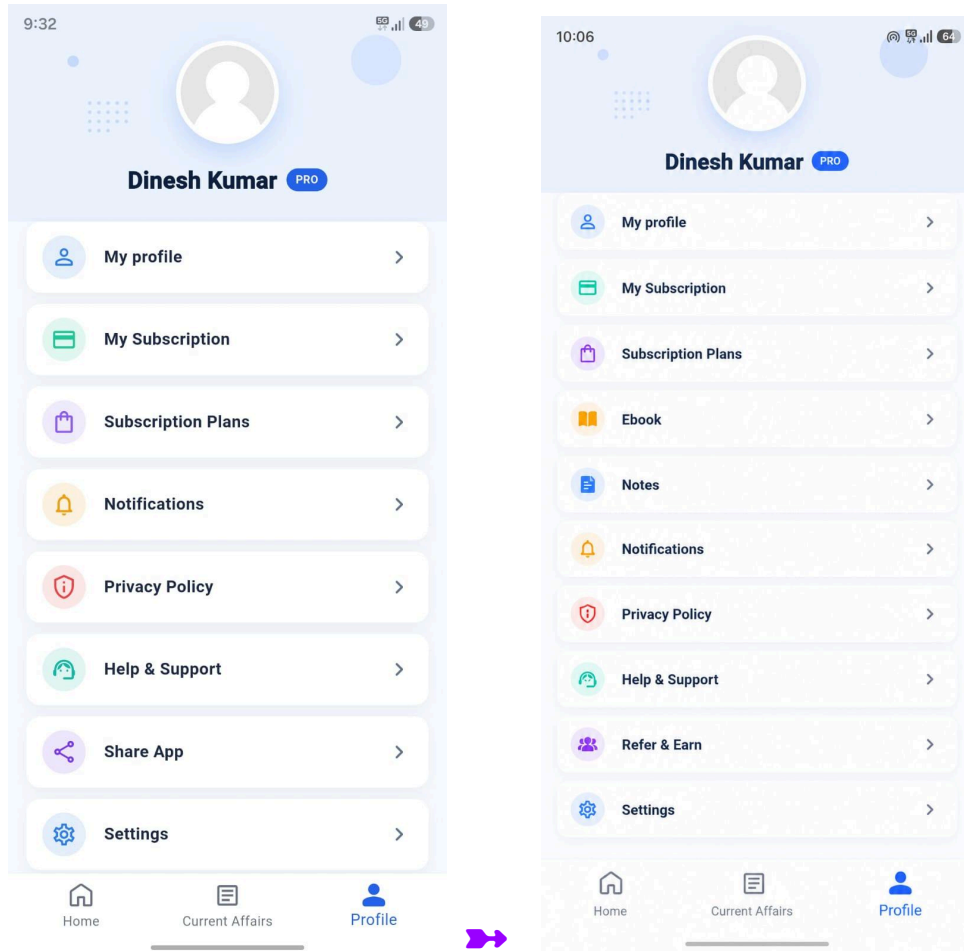

In this point, I only want the pop-up shown in the first image to be changed to look exactly like the pop-up in the second image. In short, only the pop-up design/UI needs to be changed; nothing else should be modified.

Point No. 6:

In this point, I want to change the UI of the “Exit Test” option. The UI should be redesigned to look exactly like the second image I provided. Only the UI/design should be changed; the existing functionality should remain the same.

Point No. 7:

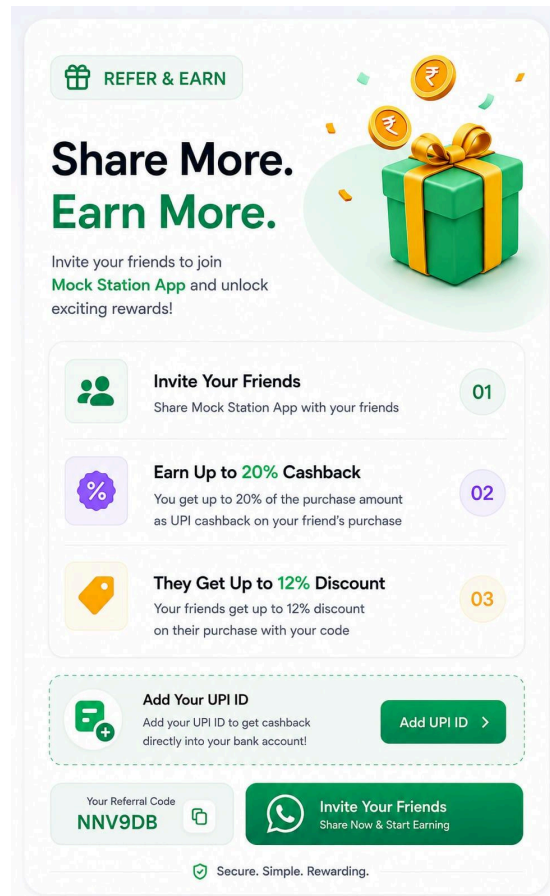

In this point, I want to add two new buttons: “Ebook” and “Notes”.

Also, I want to rename the existing “Share App” button to “Refer & Earn”.

No other changes should be made.

Point No. 8:

In this point, I want to set up the complete Refer & Earn system.

When a user clicks on the “Refer & Earn” button, the screen should open exactly like the image provided in this point, including the same cashback and discount percentages shown in the image.

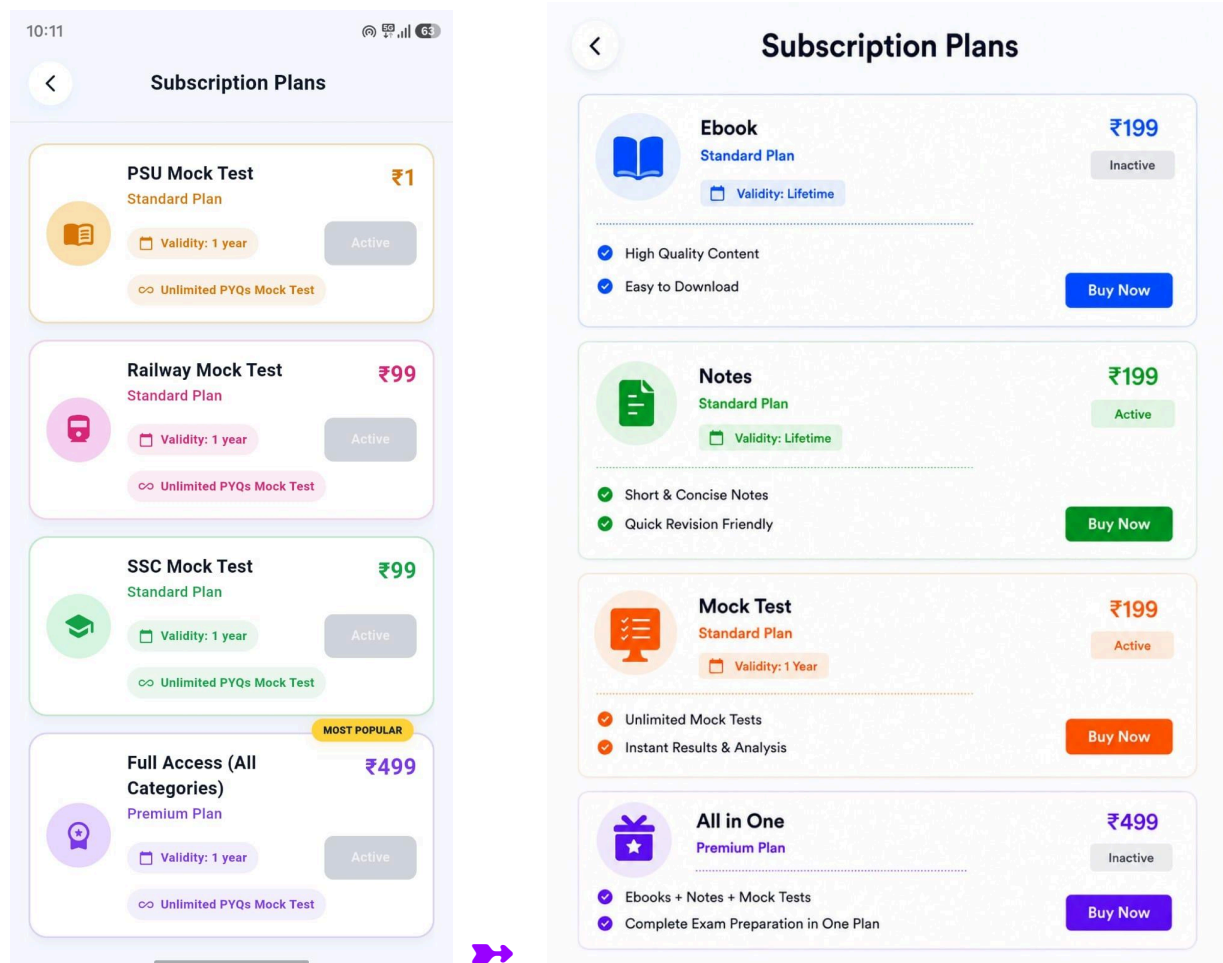

The complete referral system should work as follows:

- The existing user can share the app with their friends using their referral link/code.
- When a referred friend installs the app through that referral and purchases a plan, both users become eligible for the rewards.
- The user who referred the friend should receive the cashback shown in the provided image.
- The referred/new user should receive the discount shown in the provided image on their plan purchase.
- Simply sharing the app or installing it should not trigger any reward.

- Cashback and discount should be activated only after the referred user successfully purchases a plan.
- The referral should be properly tracked so that the reward is credited to the correct referring user and the discount is applied to the correct referred user.

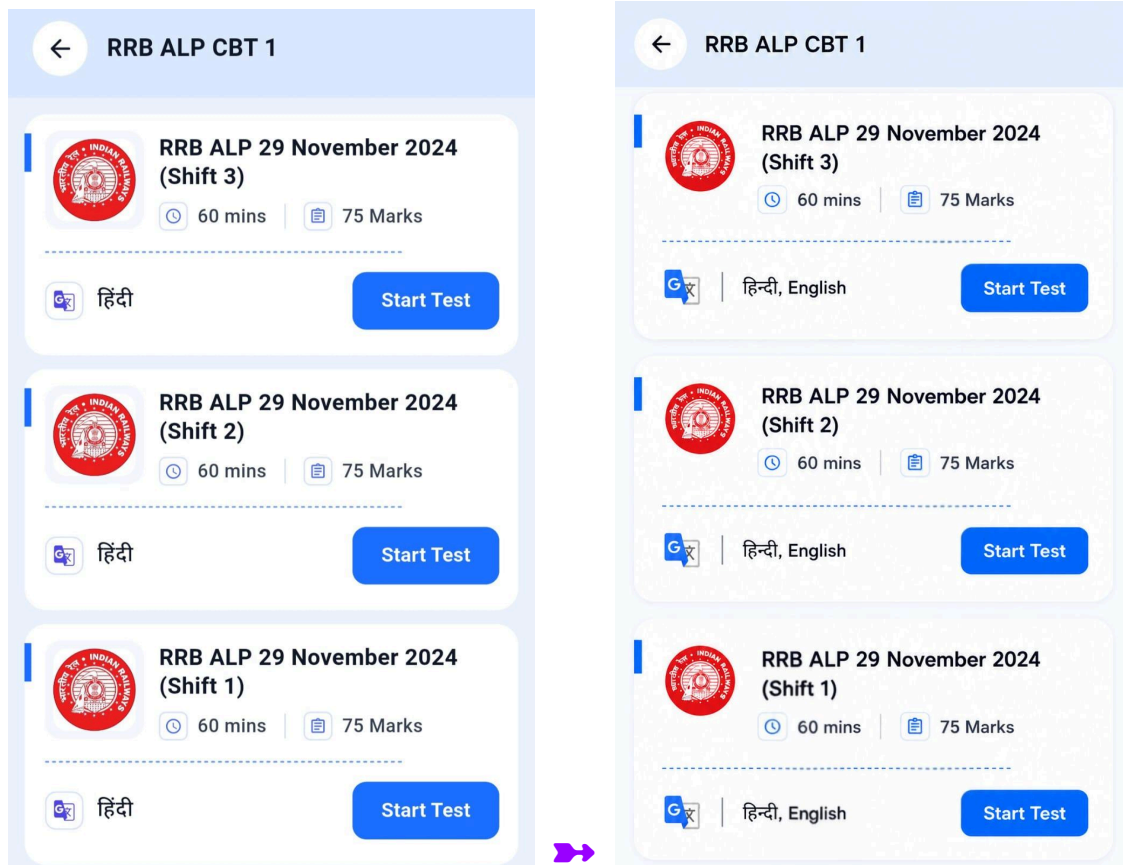

Please implement the complete UI and backend functionality accordingly, while keeping the cashback and discount percentages exactly as shown in the provided image.

Point No. 9:

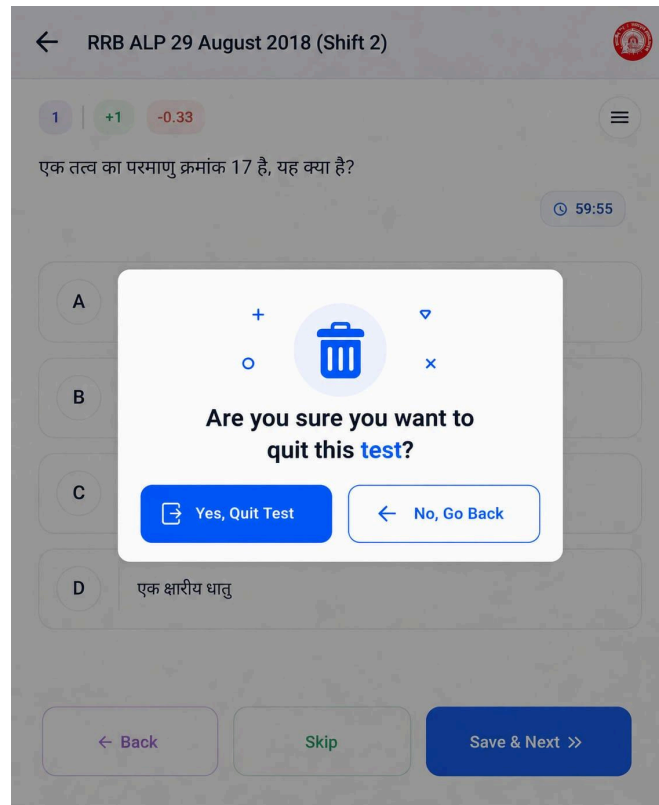

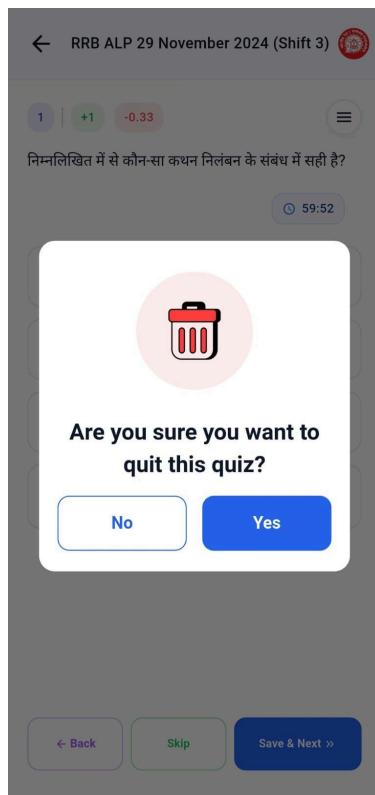

In this point, I want to change the Subscription Plans and their UI. All the changes should be made exactly as shown in the second image. The subscription plans, layout, design, and overall UI should match the second image.

Point No. 10:

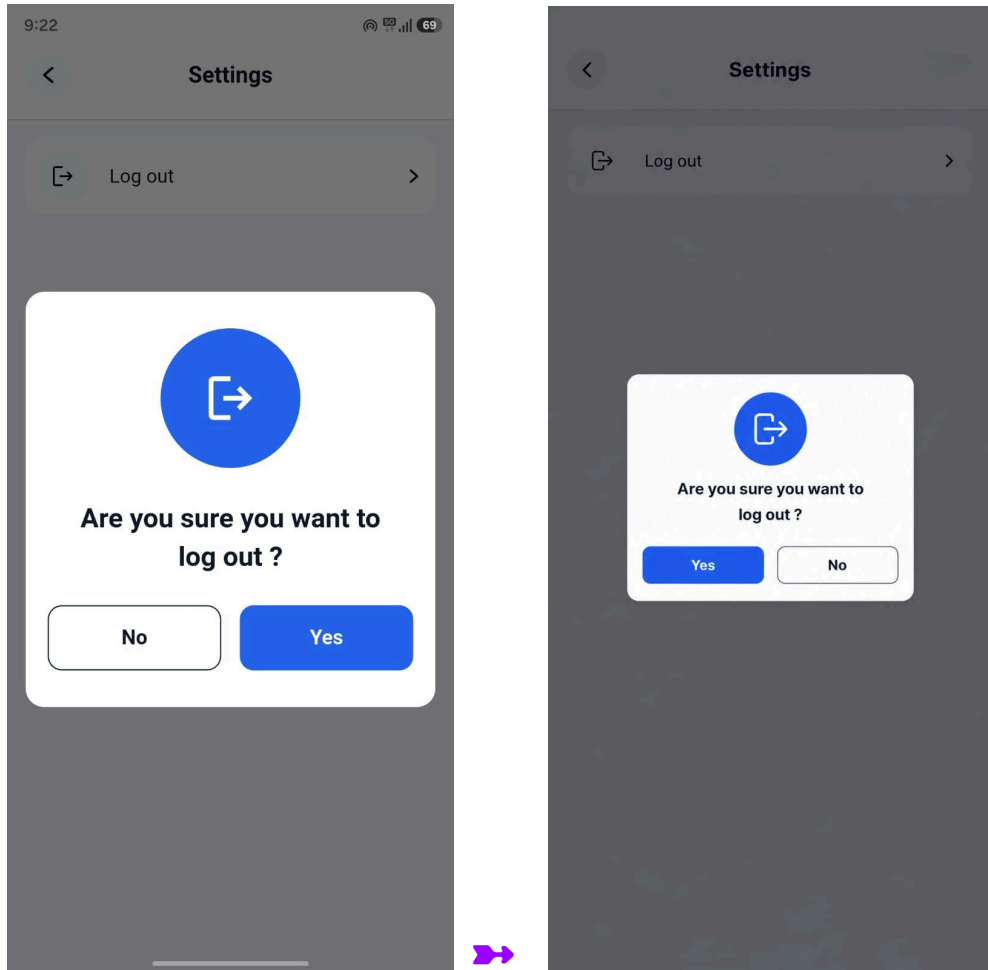

In this point, use the original Translate icon and add Hindi and English text options, exactly as shown in the second image. The UI should match the second image same to same.

Point No. 11:

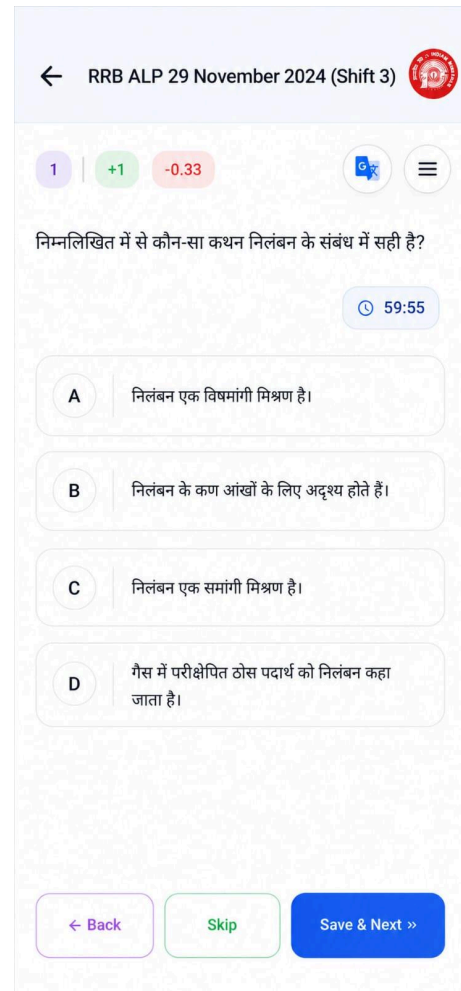

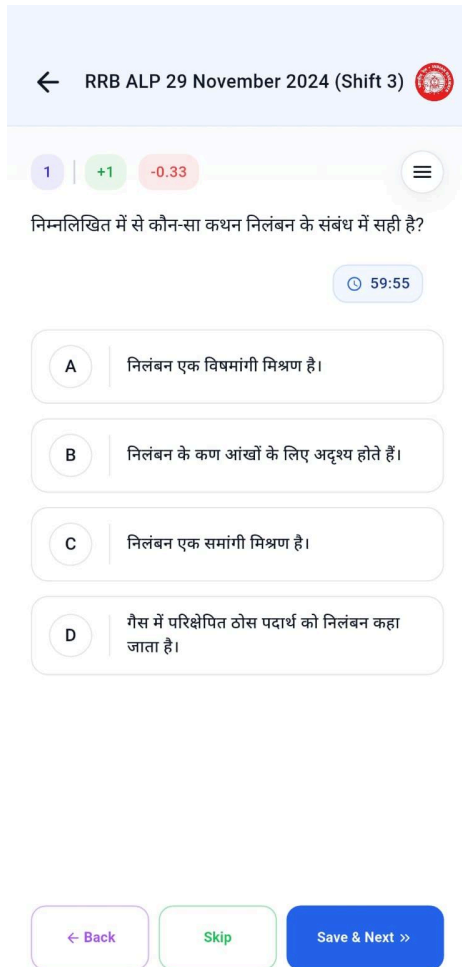

In this point, I want to change the only pop-up UI, buttons and size. It should look exactly the same as the second image I provided. Only the pop-up's UI and dimensions should be changed accordingly.

Point No. 12:

In this point, I want to change the only pop-up UI, buttons and size. It should look exactly the same as the second image I provided. Only the pop-up's UI and dimensions should be changed accordingly.

Point No. 13:

In this point, add the Google Translate icon exactly as shown in the second image. Also, add the free Google Translate feature, allowing questions to be displayed in two languages simultaneously.

The user should be able to view the questions in both languages, just like the second image.

Point No. 13:

←

RRB ALP 29 November 2024
(Shift 3)

1. इस परीक्षा में कुल 75 प्रश्न होंगे।

2. प्रत्येक प्रश्न के 4 विकल्प होंगे, जिनमें से केवल एक ही सही होगा।

3. आपको इस परीक्षा को 60 मिनट में पूरा करना होगा।

4. कृपया गलत उत्तर का चयन करने से बचें, क्योंकि नकारात्मक अंकन (Negative Marking) लागू है।

5. हर सही उत्तर के लिए आपको 1 अंक मिलेगा और हर गलत उत्तर के लिए 1/3 अंक काटे जाएंगे।

6. जो प्रश्न आप हल नहीं करेंगे, उनके लिए कोई नकारात्मक अंकन (Negative Marking) नहीं होगा।

In this point, add a horizontal line and a Google Translate box. Also, change the UI of the buttons below to match the second image exactly, same to same. Only these UI changes should be made; everything else should remain unchanged.

Point No. 14:

In this point, I want to change the Answer Key UI exactly as shown in the second image.

Also, after the answer options, add a “View Solution” button. When the user clicks it, the solution/explanation for that particular question should be displayed.

Both changes should be implemented exactly like the second image, same to same. No other changes should be made.

Point No. 15:

Sectional Summary				
Subject	Correct	Wrong	Marks	
General Science	6/25	18	0.1	
Mathematics	11/25	13	6.7	
General Intelligence and Reasoning	6/30	24	-1.9	
General Awareness and Current Affairs	4/20	16	-1.3	

Sectional Summary				
Subject	Correct	Wrong	Marks	Time
General Science	6/25	18	0.1	21:45
Mathematics	11/25	13	6.7	24:30
General Intelligence and Reasoning	6/30	24	-1.9	26:10
General Awareness and Current Affairs	4/20	16	-1.3	18:35

In the Subject Test result, under the Sectional Summary, add a feature showing how much time the user spent on each subject, exactly as shown in the second image.

The time spent should be displayed separately for every subject, and the UI/layout should match the second image same to same.

Point No. 16:

- Add a push notification feature so that the admin can send notifications to users at any time directly from the admin panel.
- Also, please create the question format for the last question section, both subject-wise and mixed-question-wise. This format should also include a “View Solution” option, so that the solution can be added while creating/adding the question itself.
- I will provide you with two types of test PDFs. Please design the question format according to those PDFs.
- If possible, please keep this question format requirement as the last point.
